SUMMARY

Software Engineer with hands-on experience in backend, web, and mobile development. Skilled in C#, ASP.NET Core, React.js, Angular.js, and Flutter, with a focus on building clean, scalable, and production-ready applications.

TECHNICAL SKILLS

Frontend: React.js, Angular.js Flutter, JavaScript, HTML, CSS, Bootstrap
Backend: C#, ASP.NET Core, Dart, MediatR (CQRS), Clean Architecture, RESTful API Design
Database: SQL Server, MongoDB, MySQL, Entity Framework Core, Dapper
Tools: IIS, Swagger, Postman, SQL Server Profiler, Git, Visual Studio, Visual Studio Code, Android Studio

EXPERIENCE

Associate Software Engineer — AgiloSoft Pvt Ltd.

Oct 2025 – July 2026

- Architected and delivered scalable backend systems in C# and ASP.NET Core, applying Clean Architecture (Domain, Application, Infrastructure, Presentation) to ensure long-term maintainability across multiple production projects.
- Designed, built, and documented RESTful APIs with ASP.NET Core; validated endpoints via Swagger and Postman, reducing integration errors during handoff to frontend and mobile teams.
- Improved data access performance by implementing Dapper with SQL Server writing optimized queries, and indexing strategies that measurably reduced query execution times.
- Built responsive React.js web interfaces and cross-platform Flutter mobile screens, integrating third-party APIs to extend application functionality.
- Managed full deployment lifecycle on IIS configuring application pools, debugging production issues, and optimizing server performance to maintain reliability across environments.

Software Engineering Intern— Bosch Pharmaceutical Pvt Ltd

Feb 2025 – April 2025

- Developed and maintained production-grade Flutter (Dart) mobile applications, contributing to the full feature lifecycle from implementation to release.
- Implemented Provider architecture for state management, ensuring clean separation of UI and business logic across the application.
- Collaborated closely with UI/UX designers to translate Figma designs into pixel-accurate, responsive Flutter screens.
- Integrated RESTful APIs and third-party services, enabling seamless data flow between mobile frontend and backend systems.
- Identified and resolved performance bottlenecks through systematic debugging and profiling, improving app stability and user experience.

Software Engineering Trainee— iPlexSoft Software House

July 2023 – Jan 2024

- Built and maintained full-stack web applications using Laravel (backend) and Bootstrap, CSS, JavaScript (frontend), delivering functional and responsive user interfaces.
- Developed and integrated RESTful APIs with third-party services, enabling seamless communication between application layers and external platforms.
- Designed and optimized MySQL database schemas, writing efficient queries to support application performance and data integrity.
- Conducted systematic testing and debugging across web modules, identifying root causes and resolving issues to ensure a stable and smooth user experience.

PROJECTS

Agha Khan University Examination Board

- Contributed to the Agha Khan University Examination Board (AKUEB) platform, owning the EPL (Examination Paper Layout) module end-to-end designing, developing, and maintaining backend services in C# and ASP.NET Core under Clean Architecture principles.
- Designed and delivered RESTful APIs for the EPL module, ensuring thorough documentation and validation through Swagger and Postman before handoff.

- Built a high-performance data access layer using Dapper and SQL Server authoring optimized queries that significantly reduced data retrieval times across examination workflows.
- Diagnosed and eliminated critical performance bottlenecks using SQL Server Profiler, applying targeted indexing and query optimization strategies to achieve measurable improvements in response times.
- Designed and executed data migration scripts to manage schema changes safely across development, staging, and production environments, ensuring zero data loss and a consistent state.
- Handled end-to-end IIS deployment and release management configuring application pools, managing build releases, and maintaining production-like stability across environments.

Accounts For Me (Invoice4me)

- Contributed to Accounts For Me (Invoice4me), a live cross-platform invoicing and accounting application, working across backend, admin portal, payment portal, and mobile app.
- Developed the Angular-based Admin Portal for managing company accounts, payments, and subscriptions.
- Built the Angular-based Payment Portal, enabling customers to process payments via mobile.
- Developed ASP.NET Core RESTful APIs, implementing business logic for invoice generation and financial workflows.
- Built and maintained the Flutter (Dart) mobile app on Android, ensuring visual consistency and smooth user experience.

Final Year Project:

- Developed the E-Cattle Mobile App using Flutter and Dart, designed to connect cattle buyers and sellers, incorporating features like microfinance integration for seamless transactions, and providing a platform for efficient and transparent trading in the cattle market.

EDUCATION

Nov 2024 Karachi, Pakistan

BACHELORS IN SOFTWARE ENGINEERING Sir Syed University of Engineering & Technology

Aug 2020 Karachi, Pakistan

INTERMEDIATE IN PRE ENGINEERING Aisha Bawani Govt. College

CERTIFICATION

June 2024 Karachi, Pakistan

CLOUD NATIVE COMPUTING PIAIC

October 2024 Karachi, Pakistan

MOBILE APPLICATION DEVELOPMENT Innovador Solution Aptech Metro Star Gate

Feb 2025 Karachi, Pakistan

MOBILE APPLICATION DEVELOPMENT NED Academy, NED University
